

Olmstead Advisory Committee (OAC) Liaisons

OAC members as well as State Department/Agency staff act as liaisons to key issue areas that fall into the Olmstead Advisory Committee's "Implementation and Oversight" role. Every issue area will not be reported on at every OAC meeting. Liaisons will know in advance if their issue area is on the agenda.

Olmstead Advisory Committee member liaisons are expected to provide a short report at Committee meetings on:

- key policy issues associated with program implementation
- concerns about projects or programs under development that merit the Committee's awareness and feedback
- general updates on the issue

This liaison report will help support the "implementation and oversight" role of the Committee and will keep the Committee informed on issues it has flagged as important.

State Department/Agency liaisons will participate in OAC meetings, providing updates and reports on their issue areas and responding to issues raised by Committee liaisons or other OAC members.

Names of Liaisons

ADHC Reform
