

Summary of Breakout Discussion on the Vision Narrative from Meeting #2

The public breakout group had an in-depth discussion about the Vision for Success themes and developed additional recommendations to advance towards finalization. These included:

- **Hesitancy around the “One Door” approach** discussed previously as it may be restrictive and reflect challenges that individuals experience with the current RC system.
- The importance of the role of **Early Start** in Master Plan. development.
- A solid **workforce** with a strong base of service providers and service coordinators that includes accessible language services with adequate compensation to protect stability.
- Efforts towards more **standardized** and **transparent** processes from RCs.
- Reviewing the QIP **90/10 payment structure** to extract insights on high-quality service delivery.
- Investing in further RC service coordinator **training on IPP drafting** with increased focus on social and emotional goals.
- Further education from service coordinators to Self-Advocates and families on the Lanterman Act and the entitlements it entails.
- Clearly defining “**equity**” and linking it to **accessibility and accountability** in an effort to mitigate the issue of high-needs individuals being placed on waivers and not receiving services.
 - Equity should include services that are trauma- and culturally-informed.
 - Reconsider the expression “right service at the right time” as it may be considered problematic if not constructed through an equity lens.
- A priority of the Master Plan should be the expansion of **self-determination** and making **self-directed opportunities** more accessible.
- There was concern expressed about the kinds of venues being used for **child day care centers**.
