Determine what you will need to maintain your health. Work with your providers, family, friends or faith-based groups to help you create a shelter in place kit.

## Next Steps

Have an action plan with family, providers and vendors letting them know how they can support you should you need to evacuate or shelter in place. Have at least three different means of transportation if you do not have your own vehicle. Make sure all your identified support people know that they are in your plan. Consider giving a copy of your house key to one of your support people if you are comfortable with that. Contact local utilities companies if you are dependent on power for assistive devices. Learn how to shut off your utilities. Review your plan with your support system at least annually and keep all important information current.
