COVID-19 One Year Later: Results of a Birth-5 Parents Poll

Mayra E Alvarez MHA
President, The Children’s Partnership

Early Childhood Policy Council
June 9, 2021
The Children’s Partnership (TCP) is a policy and advocacy organization committed to advancing child health equity.

We advocate for breakthrough solutions at the intersection of research, policy, and community engagement.
The Impacts of COVID-19 on Children: A Whole Child Perspective

- trusted caregivers
- safe and stable housing
- economically stable families
- quality child care and early education
- nutritious foods
- mental and physical health care

A Data Snapshot from California Families with Young Children

February 2021
Social, Emotional and Physical Well-Being
Survey Results: Struggles with Health Care

- 50% of unemployed parents enrolled in state sponsored health insurance (Medi-Cal and Covered California) after losing their job.

- Over a third of parents overall (34%) have attempted to enroll in Medi-Cal during the pandemic.
  - Half (50%) cited that they had problems and/or issues when applying and enrolling in Medi-Cal, the most common being the need for a lot of follow-up (23%).

- 26% say they have not been able to access medical care using telehealth during the pandemic.
  - 94% of parents agree that accessing their child’s doctor via telehealth could help them, but only 48% currently access their child’s doctor using telehealth.

- 32% have missed well-child health appointments for their child.
Survey Results: The Pandemic's Impact on Children's Development and Wellbeing

- 70% are worried about the mental health of the adults and/or child in their family.
- 87% of parents agree that receiving referrals to mental health supports could help them; only 13% have received or currently have access to mental health referrals.
- 73% of parents worry about their child’s ability to socialize with other children.
- 74% are worried that their child’s education and development will suffer.

The Children's Partnership
Survey Results: Other Concerns from Parents

- 88% worry about **exposing their family to COVID-19**.

- 69% of parents report that the pandemic has **significantly disrupted** their home and family life (74% in April 2020).

- 64% worry they’ll have to **make sacrifices in schooling or career to care** for their child during the pandemic (+5% since April 2020).

- 31% of parents are **worried about the impact issues like substance abuse and domestic violence** will have on their family as a result of the pandemic (+8% since April 2020).
Financial and food insecurity, and changes to child care arrangements
Survey Results: The Pandemic's Impact on Financial and Food Insecurity

- About a third of parents (31%) say they have skipped their or their child’s meals as a result of the pandemic.

- A third (33%) say they feel uneasy about their family’s financial situation over the next few months (53% in April 2020).
  - 40%: parents of color
  - 59%: low-income parents

- Slightly more are employed than last poll (67% vs. 61% in April 2020).
  - Fewer parents of color (58%) and low-income parents (40%) are employed.

- 61% have taken some type of leave or time off from work or school to care for their child
  - 36% in April 2020
Survey Results: The Pandemic's Impact on Child Care Arrangements

- 50% of parents also say that their current childcare facility has limited its hours, decreasing accessibility for parents.
- For parents whose child attended a home-based or center-based program before the pandemic, 34% closed temporarily and 4% closed permanently.
  - Parents of color are more likely to experience temporary closures (41%)
  - For low-income parents, 48% reported temporary closures and 8% reported permanent closures.
- 43% of children are attending in person; 37% remotely; 20% hybrid
  - Low-income parents (54%) and parents of color (44%) are more likely to report that their child is attending remotely.
Moving Forward
Survey Results: Support for Public Investments in Early Childhood Programs

- Nearly all (96%) parents say they support investing more public funds in expanding access to quality, affordable child care and preschool.

- 90% agree that California should be doing more to ensure infants and toddlers are healthy and developmentally on track at birth and through early childhood.
Supporting Child Well-Being in COVID Recovery

Positive experiences matter
