- The Racial Equity in Data Visualization Checklist: <https://www.urban.org/sites/default/files/2021/06/08/do-no-harm-guide-checklist.pdf>

WHAT COLOR IS YOUR LIGHTSABER? Results by Color

GREEN

This color is considered to be the wisest one that can easily match anyone. Conflicts are handled peacefully, plan strategically, and then fight.

Green is seen as a natural and tranquil color, reminding many of nature and life. If your favorite lightsaber color is green, you're likely someone who enjoys nature and life, and perhaps does yoga or long, peaceful walks. People may seek you as a calming presence, as someone who can offer sage advice.

Luke Skywalker, Yoda, and Qui-Gon Jinn all wielded a green lightsaber.

RED

I bet this one isn't a stretch for people but red is a bright and forceful color. It's often associated with passion and power.

While it's supposedly a corruption of a Kyber crystal, it doesn't mean you're corrupt. Notice how one of the descriptors was passion. If your favorite saber color is red, you're likely a passionate person. Maybe someone who likes control, which isn't necessarily a bad thing. You like to control your own destiny, and likely are someone who doesn't take orders very well. Neither is passion a bad thing. Passion drives creativity and love.

BLUE

Blue is usually a calming color or one that is associated with security and reliability.

The color symbolizes protection and justice. So, if this is your favorite lightsaber color, you're likely someone who cares about others, wants to protect them, and prefers an orderly way of things. You may be someone who values peace and seeks to maintain it. Perhaps you're a skilled mediator or negotiator.

Blue lightsabers are by far one of the most prolific lightsaber colors in the Jedi Order.

Blue lightsabers are typically wielded by Jedi Guardians or those that seek to defend the Order from outside malevolence that would do it harm. These Jedi are the most highly trained in the Jedi combat arts and are the Order's most adept and accomplished duelists.

YELLOW

Like red, yellow is a color that stands out. It's bright, like the sun, so it's often seen as light or energy, and even warmth.

If your favorite lightsaber color is yellow, it's likely you are a warm person that people feel welcome around, and maybe safe and protected. It may also mean you are energetic and lively, full of energy like the sun, a shining beacon of light in peoples' lives.

PURPLE

This personality is vibrant and clear. They are known to be commanders as per the ENTJ personality test. They are great leaders with bold, strong-willed personalities. Purple represents many things. It has been associated with royalty in the past. It's also a color of wisdom, bravery, spirituality, and uniqueness.

So, if you're into the purple sabers, you're likely a unique person, someone who makes their own way. You probably value creativity and wisdom and seek to broaden your world through information. You likely stand out as a diamond in the rough.

ORANGE

Red and yellow make orange and it is associated with someone who can be trusted and counted upon.

Orange is close to yellow on the spectrum, so it's no surprise that orange is bright, attention-getting, and warm. It's also seen as a spiritual color.

If orange is your color, then you could be a warm person for people to be around, maybe an attention seeker. You could also be someone more in tune with their spirituality, or perhaps on a spiritual journey of your own.

WHITE

A Kyber Crystal turns white when you heal its pain. So, if you stop a red sword's bleed, you will end up having a white or silver crystal. It reflects the owner's good intentions and humanistic sides. White has often been associated with purity and, like yellow, light. It also can represent neutrality because white is the absence of all colors.

If your favorite lightsaber color is white, then you likely are a person who makes their own way, a blank canvas on which to paint your own picture and do whatever your heart desires. You may also be someone who values peace and cleanliness, a force for good, but on your own terms.
