Meeting 3A Public Comment Log (10:00AM – 1:00PM PT, December 20, 2022)

The table below shows public comments that were made verbally during the December 20th meeting. Additional public comments can be found in the meeting's "Q&A Log" posted on the CalHHS Data Exchange Framework website.

Count	Name	Comment
1	Lucy Johns	Thank you. Hello, everybody! I made a number of comments in the Q&A that I hope will be considered eventually. I just want to highlight one about the ability of a patient to opt out of data sharing. Will there be a P&P about this? Did you hear me? Sorry. Okay.
2	Brandon Bullock	Thank you so much. Brain and bullock within the Empire health plan. Just 2 quick comments. We first wanted to express support for draft --the draft language includes in the technical requirements that would require every hospital to send ADTs to at least one QHIO. So IEHP is in strong support of that. Secondly, we also wanted to echo and kind of support comments that were previously made that the QHIO Program criteria should include that the QHIO should be California based mission driven and nonprofit work, and preferably a nonprofit organization. The reason for this is this: We believe that they have demonstrated the ability to

		prioritize and serve. Medicare MediCal plans, such as ours, our network providers, and they have a better understanding of the various requirements and expectations under CalAIM. Thank you so much.
3	John Helvey	Thank you. I just want to thank this committee for all the work that they're doing. This is a very difficult challenge in front of us and given the timeframes. I would just hope that many of the comments that have been made in the chat will be taken into consideration. I I really want to appreciate the opportunity for us to be heard. This QHIOs - I think that California has invested a lot of dollars in the current exchange of data that we need to leverage and continue for to build and move us forward towards a more patient-centered data home model. And so I just want to thank you for that. And appreciate all the hard work you guys are doing.
