Dr. William Mobley is a Distinguished Professor of Neurosciences and Associate Dean for Neurosciences Initiatives at the University of California, San Diego. He came to UCSD in June of 2009 from Stanford University where he served as the John E. Cahill Family Professor in the Department of Neurology and Neurological Sciences and was the founding director of the Neuroscience Institute. He earned his Ph.D. from Stanford University in Palo Alto, California in Neuro- & Behavioral Science in 1974 and an M.D. from the same institution in 1976. Dr. Mobley completed an internship in Pathology in 1977, and a Pediatric residency in 1979, both at Stanford University and then completed a residency and fellowship in Neurology and Pediatric Neurology at The Johns Hopkins University in 1982. While there, he was selected to serve as Chief Resident in Pediatric Neurology from 1981 to 1982. In 1983, he was certified by the American Board of Pediatrics and in 1987 by the American Board of Psychiatry and Neurology with Special Competence in Child Neurology. He is a Past President of the Association of University Professors of Neurology, the Professors of Child Neurology, and the International Society for Developmental Neuroscience. He is also a Fellow of the Royal College of Physicians (2001) and in 2004 was elected a Member of the National Academy of Sciences, Institute of Medicine (now the National Academy of Medicine). In 2006, Dr. Mobley was named a Fellow of the American Association for the Advancement of Science, in 2011 received the International Sisley-Jérôme Lejeune Prize for research in Down Syndrome and in 2014 was named to the Johns Hopkins Society of Scholars. Dr. Mobley currently serves as President of the T21 Research Society. In 2019 he was appointed interim Director of the Sanford Institute for Empathy and Compassion. His research focuses on the biology of Alzheimer disease, especially as manifest in those with Down syndrome. It encompasses studies that extend from basic cellular mechanisms to the discovery of treatments and to the compassionate care of these individuals.

Lucille Esralew received her PhD in Psychology from the Graduate School of Arts and Sciences, Columbia University (1999). Dr. Esralew is a licensed psychologist in California and New Jersey and a certified neuropsychologist who specializes in brain and behavior connections among individuals with neurodevelopmental disorders. She currently serves as the Senior Psychologist Supervisor for DDS assigned to its Office of Statewide Clinical Services and is the clinical lead for the Clinical Services Branch of that office. Prior to joining DDS in 2020, she served as Clinical Director at Redwood Coast Regional Center and has close to 30 years’ experience working with individuals with developmental disorders. She serves on the Advisory Board for the National Task Group for Intellectual Disabilities and Dementia Practices and co-chairs both its Advisory Body as well as its Consultative, Research and Scientific Panel. She spearheaded the piloting of the National Task Group Early Detections Screen for Dementia (NTG-EDSD) which is used internationally to capture information about changes in functioning that may relate to Alzheimer’s Disease and related disorders among individuals with intellectual and developmental disorders.
Lisa Rund is Registered Nurse serving individuals with intellectual and/or developmental disabilities as the Health Services Associate Coordinator for San Andreas Regional Center (SARC). SARC is based in San Jose, California and serves nearly 18,000 individuals in four counties. With over 40 years of nursing experience and continuing education, Lisa provides medical case management, outreach to local hospitals and clinics, and education and training to service providers, care providers and regional center personnel, and more. She has served as a Regional Trainer for the National Task Group for Intellectual Disabilities and Dementia Practices and has continued to educate I/DD professionals and service providers in the Bay Area with the material. Lisa received her nursing degree from St. Elizabeth School of Nursing in Lafayette, Indiana and is a member of the Developmental Disabilities Nurses Association (DDNA).

Todd Shetter
Mr. Shetter has been in the senior housing and health care industry for more than 30 years. As the Chief Operating Officer at ActivCareLiving, he is responsible for overseeing all aspects of the day-to-day operation of ActivCare’s residential memory care communities, managing personnel and overseeing resident care needs. Todd is a licensed Nursing Home and Residential Care Facility Administrator. Recently, he served on the Governor’s Task Force on Alzheimer’s (Disease) Prevention and Preparedness headed by Maria Shriver. The task force provided recommendations to the Governor to prepare for the anticipated rise in the number of families affected by the disease. Mr. Shetter also serves on the California Health and Human Services Alzheimer's Advisory Committee which represents consumers, providers, and advocates of those living with Alzheimer’s disease and related disorders. An active advocate for senior housing and assisted living in California, he serves on the California Assisted Living Association (CALA) Board of Directors and is a member of the Public Policy Committee. He is a past recipient of the Advocate of the Year Award from CALA. Mr. Shetter currently serves on the Community Advisory Board for the UCSD Institute of Healthy Aging and is a past member of the County of San Diego’s Alzheimer’s Project Care Roundtable. He graduated from Colorado State University with degrees in Public Relations and Sociology.

Kimberly Keane
As the Director of Program Development for Noah Homes, Kim has direct responsibility for the overall program design, supporting 90 residents and 130 staff members. Kim is passionate about staff education and works diligently to ensure that Care Professionals are well-trained to provide the highest quality care for adults with intellectual and developmental disabilities. She is deeply committed to expanding and enhancing a dementia-capable system for Care Professionals.
She has over 20 years of experience in curriculum development, design, implementation, and execution of customized training solutions for various organizations nationwide.

Kim has developed, tested, and trained over 800 care providers in the Dementia and Disabilities Escape Room™ - a highly specialized, hands-on training program for Care Professionals who work with adults with intellectual and developmental disabilities diagnosed with dementia.

Kim graduated from Cuyamaca College with an associate degree in Communication Studies. She holds multiple certifications, including Adult Residential Facilities Administrator, Residential Support Specialist I and II, and Direct Support Specialist I and II. She is a Certified Instructor for the National Task Group (NTG) on Intellectual Disabilities and Dementia Practices and the Dementia and Disabilities Escape Room™.

**Marc Loupe**
Marc is a partner of CFOs2Go; a division of the 2Go Advisory Group. He leads the firm’s agriculture industry sector and is a member of its executive committee. He brings more than 25 years to the firm’s agricultural-based clients. His past corporate roles include CFO for AAA (Northern California, Nevada and Utah) and for Sage Software-North America and Chief Audit Executive for three publicly-held companies: Ampex Corporation, Sun Microsystems and CA Technologies.

Marc obtained his undergraduate degree from Cal Poly, San Luis Obispo, a major agricultural school; he holds a Certificate in Marketing and Strategy from Stanford University, a Certificate in Accounting and Finance in the Wine Industry from Sonoma State University and a Master of Science degree in Accounting from Golden Gate University.

At the board level, he is Co-Vice Chair of the Alzheimer’s Association, Treasurer of the International Wine and Food Society. His professional affiliations include the North Bay Food Industry Group, Financial Executive International and the American Institute of Certified Public Accountants.

Marc Loupe helped care for his younger brother, Jean (pronounced John), who was born with Down syndrome and later developed dementia. Marc also helped care for his mother, who developed dementia after Jean started experiencing dementia symptoms.
