

**California Health & Human Services Agency
Center for Data Insights and Innovation
Data Exchange Framework Implementation Advisory Committee
Meeting 3B Chat Log (10:00AM – 2:00PM PT, January 10, 2023)**

The following comments were made in the Zoom chat log by Implementation Advisory Committee Members during the January 10th meeting:

11:06:33 From Linnea Koopmans To All Panelists:

Hello! Missed role call but I'm here.

11:16:02 From Kevin McAvey To Everyone:

Full draft application (parts A/B) available online here: <https://www.chhs.ca.gov/wp-content/uploads/2023/01/QHIO-2023-Application-Parts-A-and-B-for-IAC-01.10.2023-1.pdf>

11:21:53 From DeeAnne McCallin To Everyone:

+1 to Ali. Perhaps "Non Profit or Six months cash on hand"

11:30:18 From DeeAnne McCallin To Everyone:

Are there any parameters or guardrails as to who can sign DSA that is not specifically listed in AB133? Those who voluntarily sign the DSA. I ask not only about QHIOs, but they too fall into not-listed in AB133.

11:32:46 From Jonah Frohlich To Everyone:

@DeeAnne: I don't believe so. Any entity that desires to participate in the Framework should be able to do so, but that commits them to meeting the requirements outlined in state law, the data sharing agreements and its P&Ps.

11:34:12 From Lori Hack To Everyone:

can we do something like the DMHC Tangible Net Equity which is a line of credit or other equivalent

11:35:57 From Lori Hack To Everyone:

Can CISO be a part time, shared resource?

11:39:16 From Jonah Frohlich To Everyone:

@Lori Hack: Isn't TNE based on some percent of net assets? (you and Bill B can correct me). Are you thinking that there be some threshold based on the size of the entity and their ability to secure credit (or equivalent)?

11:43:09 From Lori Hack To Everyone:

The line of credit can count towards cash on hand equivalent.

11:57:44 From Aaron Goodale To Everyone:

There are Vendors that offer Penetration test services

12:01:43 From Lori Hack To Everyone:

@Aaron indeed, just don't want to add another high cost vendor to the list of costs

12:09:27 From Cathy Senderling-McDonald To All Panelists:

Is the thinking that grants would be for those who are required or mandatory signatories? What about optional signatories, could they apply?

12:10:55 From Cameron Kaiser To All Panelists:

I know a number of public health jurisdictions who would be very interested in these grants.

12:13:24 From Courtney Hansen To All Panelists:

I encourage all panelists to post comments and questions to "everyone" rather than just to "hosts and panelists" so the public can track these conversations. Thank you!

12:17:04 From DeeAnne McCallin To Everyone:

+1 to David Ford, but also making sure the public health depts. have a pathway (or other funding) to better data exchange

12:17:55 From Aaron Goodale To Everyone:

+2 to David Ford. A pathway for an application for an umbrella organization would be helpful.

12:26:17 From Felix Su To Everyone:

Agree with DeAnne--would note public health depts. are not mandatory signatories and therefore, under this proposal, not yet eligible for these grants!

12:26:27 From Felix Su To Everyone:

Something that perhaps should be reconsidered

12:34:13 From Felix Su To Everyone:

+1 Aaron re: the complete package

12:34:51 From Aaron Goodale To Everyone:

+1 Troy

12:40:57 From Cary Sanders To Everyone:

+1 Cary

12:50:47 From Amie Miller To All Panelists:

agree, concerned this leaves behavioral health behind.

12:56:50 From Felix Su To Everyone:

+1 David (and some in the public Q&A): Post-onboarding ongoing costs remain and need be addressed with public support as well!

12:59:47 From David Ford To Everyone:

Worth noting - the statute directs the state to spend TA funding on mandatory signatories. See HSC 130290(g).

13:01:16 From Lori Hack To Everyone:

Does this include dental providers? Also, Labs are required to sign so presumably get funding too.

13:02:02 From Lori Hack To Everyone:

The physician group size seems artificial. I would recommend funding available up to \$50k but not try to sort by number of docs. It is number and type of interfaces that is key
